Pollok Mall
Client: Retail Property Holdings Ltd
Main Contractor: Bovis Lend Lease
Architect: BDP
Engineer: Stuart McTaggart
Contract Period: 38 weeks
Project Value: £12 Million
Scope of Works: Drainage, Pile Caps, Post Tension ground floor suspended slabs and concrete topping to metal decking.

Dunne Building and Civil Engineering are working back to back with Bovis Lend Lease at the new Silverburn Retail Centre contract in Glasgow, appointed by the client, Retail Property Holdings.

Dunne Building & Civil Engineering are carrying out the Concrete Substructure and Superstructure Works within the Main Mall, our second award at the Pollok Town Centre Development, as we are also Main Contractor for the £15 million Multi Storey Car Park. As Main Contractor on the MSCP Project, we are proving that our vast experience in the design and build of car parks is evident as the works near completion.

The design of the four storey car park is a customised solution to meet customer, business and operational needs with a capacity of nearly 2,000 spaces. This project will form a major part of the redevelopment and regeneration of the Greater Pollok Initiative.

The Shopping Mall is also progressing on time and on budget, where Dunne Building and Civil Engineering are appointed concrete frame contractors by Bovis Lend Lease on the Silverburn Project, with an estimated value of 8.4 million. The erection of the steelwork, installation of post tensioned and traditional concrete slabs have been completed, defining the overall structure for the Debenhams and Marks and Spencers Department Stores. The works package also includes drainage, pile caps and concrete topping to metal decking which are all

progressing to schedule and we are looking forward to the successful completion of works by October 2006 for phase one.

Dunne Building & Civil Engineering operate within the UK to fulfil the requirements of Management and Construction Management Forms of Contract. We have developed operational and management systems to become recognised as a leading Infrastructure, Civils and Specialist RC Frame Contractor. Whilst our core business remains in the Civils and Structural market, the group has expanded operations to include other specialist package works such as Industrial Concrete Flooring, Specialist Plant Hire and Design and Build of Car Parks, Commercial and Industrial Units. We are also proud of our association with Conforce who have been working in conjunction with The Dunne Group to deliver all the projects Post Tensioning requirements.

The Dunne Group of Companies, including Dunne Building & Civil Engineering Ltd, Dunne Plant Hire Ltd, Dunne Concrete Flooring Ltd and Dunne Developments Ltd have grown rapidly due to the success of delivering projects on time and on budget.

The flexibility demonstrated by this successful broadening of the market base has enabled the Group to maintain its financial strength in an increasingly demanding Industry.
